

## INTERNAL BRIEFING – LEVEL 6 CLEARANCE

Subject: Status of Unregulated Enhanced Activity

Enhanced developments show signs of escalated disengagements amongst prominent superhuman operatives. They have transformed from a cohesive reactionary unit to operating as a fully independent group lacking cohesion—with some seemingly acting on their own accord against pre-established pacts.

This intel indicates a breakdown of the working ideology. Prominent figures which had enduring relationships with the global security networks have gone quiet or simply desk-bound. Not sanctioned Supervention has been documented across numerous areas of interest more than once.

The increasing perception that gaps in personal loyalty are superseding institutional allegiance is evident. These so called “heroes” seem capable of remapping operational geographies whose absence of standards renders them uncontested “accountability voids” twisting junctures, while previously boasting unparalleled operational flexibility.

Recommended Action: Assess the control of sorties with regard to legal boundaries and diplomatic jurisdiction of supers with powers.
